Notes about our price list and our service:-

This price list represents the range of equipment that we normally carry in stock. Each manufacturer and importer that we deal with has a wide range of machinery that will not all be listed here so if you cannot see a machine to suit you then please contact us and we will do our utmost to help you.

We aim to provide a wide range of equipment offering good value for money at all times and with an emphasis on the better quality end of the market.

All machines that we supply will normally be fully assembled and where appropriate fuelled & oiled ready to use!

Most machines can be delivered free of charge within our local area.

We offer a **Half Price Service** on any new machines sold during the year provided that they are booked in for service during November or December which is our winter servicing period.

We provide a high quality parts and service backup for all machines that we sell.

In the event of a machine failure during the warranty period, we will give absolute priority to the repair, often providing an immediate or same-day service.

All prices quoted are inclusive of VAT at 20%

The specifications in this price list are intended as a means of comparing products within our product range. They are subject to change without notice and although we do our utmost to ensure that they are correct it is advisable to contact us to confirm exact current specifications and prices prior to purchase.

If you do find the same machinery advertised locally or nationally at a lower price then please contact us as we will always consider matching competitors for local business.

Ideally we want to supply machines within our normal local delivery area (max 30 miles) as we believe that most equipment requires regular maintenance and ready availability of spare parts. There are already too many people selling equipment via the internet, and indeed from larger stores where there is no provision for future servicing or even warranty backup by them. Prices are often attractive but **claims that national service networks are available may be misleading.** Although warranty cover is provided by the manufacturer the actual warranty repair is usually carried out by specialist dealers such as ourselves and our priority is always to look after our own customers as they are where our future lies.

Robot Mowers

The robotic mowers, once installed, will automatically cut your lawn to a pre-programmed schedule. They generally need to be programmed to cut for a few hours daily and most models are powered by Lithium Ion batteries. The mower senses when the battery power is low and automatically returns to its charging base for a re-charge before setting out again.

As the grass is being cut on such a regular basis, the cuttings are very fine so will quickly decompose and be absorbed back into the lawn as a natural fertiliser. This daily cutting also means that the grass always has a tidy appearance instead of the nicely "Just Cut" look at the weekend and the "I Badly Need Cutting" look a fortnight later.

We have a working machine available to view on our small lawn area.

Installation is fairly straightforward for anyone with reasonable DIY skills but can be performed by an approved technician at prices from £299.00 if required.

Cub Cadet XR5 1000 £1430.00

The XR5 machines are the smallest of the Cub Cadet Range. 2.8Ah battery gives a maximum guaranteed cutting area of up to **500 square metres** with a possible maximum of up to 1000 square metres in ideal conditions. This model is also controllable by smartphone app and Roboconnect.

Cub Cadet XR5 2000 £2015.00

The same basic machine as the XR5 1000 but fitted with larger 4.9Ah battery. Recommended maximum guaranteed cutting area of up to **1200 square metres** with a possible maximum of up to 2000 square metres in ideal conditions.

Cub Cadet XR3 4000 £2490.00

The XR3 machines are the largest of the Cub Cadet Range. They have two blades and dual brushless motors. The XR3 4000 is capable of cutting areas up to 4000 square metres in ideal conditions. This model is also controllable by smartphone app and Roboconnect but is not supplied with the Robohome.

Cub Cadet XR3 5000 £3190.00

The same platform and features as the XR3 4000 but supplied with Robohome and higher capacity batteries. This gives a possible maximum cutting area of up to 5000 square metres in ideal conditions. This model also has a GPS location feature that allows the position of the mower to be tracked and also allows the machine to check full area cutting.

Robot Mowers – cont

Stiga Stig G600

£999.00

rrp £1149.00

Similar to the Stig 300 but with a maximum guaranteed cutting area of up to **600 square metres**. Height adjustment from 20mm to 60mm. Slightly more even ground coverage due to 3 go-to points and less border marking with run-beside-wire return to base. Boundary wire and pegs not included.

Stiga Stig G1200

£1249.00

rrp £1449.00

The Stig G1200 is the largest of the Stiga wire guided range with a maximum guaranteed cutting area of up to **1200 square metres**. Height adjustment from 20mm to 60mm. 5 go-to points and run-beside-wire return to base. Boundary wire and pegs not included.

New Stig A Series – Autonomous robots with wire-free installation

Stiga Stig A1500

£2499.00

rrp £2948.00

The Stig A1500 is the smallest of the new Stiga Autonomous robots with a maximum guaranteed cutting area of up to **1500 square metres**. 18cm cutting width. Height adjustment from 20mm to 60mm.

Wireless installation via phone app. The active guidance system and organised cutting allow this machine to cut more efficiently than the random patterns of the wired robots.

Initial installation is much simpler than wired machines but the ability to simply change the cutting area to suit different seasons (excluding areas where daffodils are planted for example) or for short periods (garden party or trampoline for example) is a unique feature.

Stiga Stig A3000

£3599.00

rrp £4097.00

The Stig A3000 is similar to the Stig A1500 in operation but with larger battery capacity and 26cm cutting width it has a maximum guaranteed cutting area of up to **3000 square metres**. Height adjustment from 20mm to 60mm.

Wireless installation via phone app. The active guidance system and organised cutting allow this machine to cut more efficiently than the random patterns of the wired robots.

Stiga Stig A5000

£4799.00

rrp £5502.00

The Stig A 5000 shares the same body as the A3000 but a better battery capacity enables it to cut areas up to **5000 square metres**. Height adjustment from 20mm to 60mm.

Wireless installation via phone app. The active guidance system and organised cutting allow this machine to cut more efficiently than the random patterns of the wired robots.

BATTERY POWERED RIDE-ON MOWERS

These are new machines to the market in the UK and offer performance equivalent to their petrol powered equivalents. They are more costly than their petrol neighbours but are much simpler in design with no drive belts or idler pulleys so will be simpler to maintain. The cost of running is also significantly cheaper than petrol.

One major advantage over the petrol machines is their dramatically reduced noise output, making them ideal for use near schools, offices, hospitals etc, as well as having less impact on neighbours.

Collecting.

1. **Alko R85.1 Li** £4199.00 *rrp £4499.00*

Ride-on mower with 81cm / 32" cutting width fitted with 190 litre grass collector and supplied with mulch plug. This machine is powered by a 72v 31Ah (**2200Wh**) **Lithium Ion battery** and has a run time of approximately 150 minutes. **Capable of cutting up to 6000 square metres.** Charging time is approx. 12 hours. Height of cut is adjustable from 25mm to 130mm.

2. **Stiga Swift 372e** £2999.00 *rrp £3493.00*
