Notes about our price list and our service:-

This price list represents the range of equipment that we normally carry in stock. Each manufacturer and importer that we deal with has a wide range of machinery that will not all be listed here so if you cannot see a machine to suit you then please contact us and we will do our utmost to help you.

We aim to provide a wide range of equipment offering good value for money at all times and with an emphasis on the better quality end of the market.

All machines that we supply will normally be fully assembled and where appropriate fuelled & oiled ready to use!

Most machines can be delivered free of charge within our local area.

We offer a **Half Price Service** on any new machines sold during the year provided that they are booked in for service during November or December which is our winter servicing period.

We provide a high quality parts and service backup for all machines that we sell.

In the event of a machine failure during the warranty period, we will give absolute priority to the repair, often providing an immediate or same-day service.

All prices quoted are inclusive of VAT at 20%

The specifications in this price list are intended as a means of comparing products within our product range. They are subject to change without notice and although we do our utmost to ensure that they are correct it is advisable to contact us to confirm exact current specifications and prices prior to purchase.

If you do find the same machinery advertised locally or nationally at a lower price then please contact us as we will always consider matching competitors for local business.

Ideally we want to supply machines within our normal local delivery area (max 30 miles) as we believe that most equipment requires regular maintenance and ready availability of spare parts. There are already too many people selling equipment via the internet, and indeed from larger stores where there is no provision for future servicing or even warranty backup by them. Prices are often attractive but **claims that national service networks are available may be misleading**. Although warranty cover is provided by the manufacturer the actual warranty repair is usually carried out by specialist dealers such as ourselves and our priority is always to look after our own customers as they are where our future lies.

| | Similar specification to Climber 9.27 above but 4 Wheel-Drive and fitted with seat suspension system . 385kg. | | |

***** See details of our price promise on page 2 *****

Zero-Turn machines

Steering Wheel Design

1. **Cub Cadet – XZ6 S107 (New)** £5699.00 *rrp £5999.00*

Zero-Turn tractor mower with new 679cc **Cub EFI (fuel injected) engine giving up to 25% fuel economy**. 117cm 46" cut with Zero-Turn capability. Twin hydrostatic transmission and special steering linkage allows this machine to spin round on its rear axle. Other Zero-Turn machines achieve this by using two steering levers, requiring a lot of operator skill but **this machine uses a standard steering wheel** making it as easy to use as a standard tractor. Other benefits of the system are improved traction and control on slopes and the rear wheels are wider spaced than standard tractors making it more stable. The cuttings can be side discharged or mulched. 234kg.

2. **Cub Cadet – XZ6 S117 (New)** £5979.00 *rrp £6299.00*

As XZ6 S107 but with 117cm, 46" fabricated deck and powered by 726cc Kawasaki engine.

3. **Cub Cadet – XZ6 S127 (New)** £6549.00 *rrp £6899.00*

As XZ6 S107 but fitted with 127cm, 50" reinforced fabricated deck and sturdier transmission.

4. **Cub Cadet – XZ3 122** £6999.00 *rrp £7349.00*

Same design concept as XZ2 but heavier built machine and heavier duty fabricated cutter deck. 726cc Kawasaki V-Twin engine and 122cm 48" cutting width. 312kg.

5. **Cub Cadet – Z1 137** £11125.00 *rrp £11712.00*

Same design concept as XZ machines but heavier build again for professional work. 747cc Kohler V-Twin, fuel injected engine and 137cm 54" cutting width. Height adjustment 26-127mm. 360kg.

6. **Cub Cadet – Z5 152** £16145.00 *rrp £16995.00*

Heaviest built of the Cub Cadet Zero-Turn machines built for professional work. Power Steering. 852cc Kawasaki V-Twin engine and 152cm 60" cutting width. Height adjustment 26-127mm. 680kg.

7. **Cub Cadet – Z7 183** £19950.00 *rrp £21000.00*

As Z5 152 but fitted with 999cc Kawasaki engine and 183cm 72" cutter deck. 732kg.

FRONT CUT RIDE-ON MOWERS

The front mounted cutter decks allow cutting into corners and under obstacles where mid-mounted decks could not reach. Mulching decks are quieter in operation than grass collecting machines and cutting time is greatly reduced as there is no need to stop for trips to the grass tip. Mulching is only suitable where regular cutting is possible however

Many of the current cutter decks can be used in either mulching mode for a fine finish or rear-discharge mode where the grass is too long for mulching. This does require the removal of a baffle from under the deck.

The Stiga machines comprise of rear-wheel steer and articulated steering. With rear-wheel steer machines more care needs to be taken when moving around obstacles as the rear end of the machine will turn towards any obstacle that you want the machine to turn away from. A sharp turn away from a wall might end up with the back of the mower hitting the wall.

With articulated steering the rear wheels always follow the track of the front wheels making it much easier to manoeuvre around obstacles. The steering can feel a bit heavier with this system but many machines now offer power steering, making them extremely easy to control.

Many models also offer 4-wheel drive for improved traction on sharp turns and on slopes.

Two Wheel Drive

- | | | | |
|----|---|----------|---------------------|
| 1. | Stiga Park 300M (85) | £2999.00 | <i>rrp £3428.00</i> |

BATTERY POWERED RIDE-ON MOWERS

These are new machines to the market in the UK and offer performance equivalent to their petrol powered equivalents. They are more costly than their petrol neighbours but are much simpler in design with no drive belts or idler pulleys so will be simpler to maintain. The cost of running is also significantly cheaper than petrol.

One major advantage over the petrol machines is their dramatically reduced noise output, making them ideal for use near schools, offices, hospitals etc, as well as having less impact on neighbours.

Collecting.
