Notes about our price list and our service:-

This price list represents the range of equipment that we normally carry in stock. Each manufacturer and importer that we deal with has a wide range of machinery that will not all be listed here so if you cannot see a machine to suit you then please contact us and we will do our utmost to help you.

We aim to provide a wide range of equipment offering good value for money at all times and with an emphasis on the better quality end of the market.

All machines that we supply will normally be fully assembled and where appropriate fuelled & oiled ready to use!

Most machines can be delivered free of charge within our local area.

We offer a **Half Price Service** on any new machines sold during the year provided that they are booked in for service during November or December which is our winter servicing period.

We provide a high quality parts and service backup for all machines that we sell.

In the event of a machine failure during the warranty period, we will give absolute priority to the repair, often providing an immediate or same-day service.

All prices quoted are inclusive of VAT at 20%

The specifications in this price list are intended as a means of comparing products within our product range. They are subject to change without notice and although we do our utmost to ensure that they are correct it is advisable to contact us to confirm exact current specifications and prices prior to purchase.

Price Promise

If you do find the same machinery advertised locally or nationally at a lower price then please contact us as we will always consider matching competitors for local business.

Ideally we want to supply machines within our normal local delivery area (max 30 miles) as we believe that most equipment requires regular maintenance and ready availability of spare parts. There are already too many people selling equipment via the internet, and indeed from larger stores where there is no provision for future servicing or even warranty backup by them. Prices are often attractive but **claims that national service networks are available may be misleading**. Although warranty cover is provided by the manufacturer the actual warranty repair is usually carried out by specialist dealers such as ourselves and our priority is always to look after our own customers as they are where our future lies.

CORDLESS / BATTERY (cont)

New Stiga/Mountfield 500 Series Battery & Charger Range compatible with 500/700/900 Series Mowers and Hand Tools.

The 500, 700 and 900 series mowers accept two batteries for longer running times and higher performance. They require one battery of at least 4ah and will then run on any combination. The smaller batteries are lighter and are therefore more suited to the hand tools where weight might be an issue (especially the hedgecutter).

Batteries

E420	2AH Battery – 86.4Wh - 0.9kg	£99.00	<i>rrp £109.00</i>
E440	4AH Battery – 172.8Wh - 1.4kg	£129.00	<i>rrp £142.00</i>

Robot Mowers

The robotic mowers, once installed, will automatically cut your lawn to a pre-programmed schedule. They generally need to be programmed to cut for a few hours daily and most models are powered by Lithium Ion batteries. The mower senses when the battery power is low and automatically returns to its charging base for a re-charge before setting out again.

As the grass is being cut on such a regular basis, the cuttings are very fine so will quickly decompose and be absorbed back into the lawn as a natural fertiliser. This daily cutting also means that the grass always has a tidy appearance instead of the nicely “Just Cut” look at the weekend and the “I Badly Need Cutting” look a fortnight later.

Installation is fairly straightforward for anyone with reasonable DIY skills but can be performed by an approved technician at prices from £199.00 if required. Historically, most machines would have required a boundary wire to be pegged out or installed by special machine underground. Most manufacturers have now developed autonomous machines guided by satellite technology, that can operate within a border simply mapped out by smartphone and accurate to within approximately 20mm without the need for the boundary wire. Further improvements to navigation and obstacle avoidance are provided by cameras and Lidar. This makes for a much simpler installation and allows much more flexibility if changes need to be made at a later date. They also cut systematically in straight lines so operate for significantly less time than the wire guided machines.

Stiga Stig A Series – Autonomous robots with wire-free installation

Stiga Stig A750	£1699.00	<i>rrp £1929.00</i>
------------------------	----------	---------------------

The Stig A750 has a maximum cutting area of up to **900 square metres**. 18cm cutting width. Height adjustment from 20mm to 60mm. 5 year conditional warranty.

Stiga Stig A1500	£2399.00	<i>rrp £2769.00</i>
-------------------------	----------	---------------------

The Stig A1500 has a maximum guaranteed cutting area of up to **1500 square metres**. 18cm cutting width. Height adjustment from 20mm to 60mm.

Wireless installation via phone app. The active guidance system and organised cutting allow this machine to cut more efficiently than the random patterns of the wired robots.

Initial installation is much simpler than wired machines but the ability to simply change the cutting area to suit different seasons (excluding areas where daffodils are planted for example) or for short periods (garden party or trampoline for example) is a very useful feature. 5 year conditional warranty.

Stiga Stig A3000	£3199.00	<i>rrp £3699.00</i>
-------------------------	----------	---------------------

The Stig A3000 is similar to the Stig A1500 in operation but with larger battery capacity and 26cm cutting width it has a maximum guaranteed cutting area of up to **3000 square metres**. Height adjustment from 20mm to 60mm.

***** See details of our price promise on page 2 *****

Wireless installation via phone app. The active guidance system and organised cutting allow this machine to cut more efficiently than the random patterns of the wired robots. 5 year conditional warranty.

Robot Mowers – cont

Autonomous robots with wire-free installation

Segway i105E

rrp £749.00

The Segway i105E is the smallest of their robots that operate entirely via GPS and therefore do not require a boundary wire. This mower is capable of cutting **up to 500 square metres**. Handles slopes up to 30%. Additional 4G module for enhanced connectivity - £99.99

Segway i108E

rrp £899.00

The Segway i108E is similar to the i105E but is capable of cutting **up to 800 square metres**. Additional 4G module for enhanced connectivity - £99.99

Segway i206E AWD

NEW

rrp £799.00

The Segway i206E is capable of cutting **up to 600 square metres**. **Rear driven castor wheel** allows it to cope with steeper slopes and aids turning. Network RTK and AI cameras provide precise navigation and obstacle avoidance.

Segway i210E AWD

NEW

rrp £1099.00

The same basic model as the Segway i206E but is capable of cutting **up to 1000 square metres**. **Rear driven castor wheel** allows it to cope with steeper slopes and aids turning. Network RTK and AI cameras provide precise navigation and obstacle avoidance.

Segway i210E LIDAR

NEW

rrp £1099.00

The same basic model as the Segway i210E but is standard **2 wheel drive**. Capable of cutting **up to 1000 square metres**. Navigation is by **Lidar** and AI cameras so no satellite connection required. Handles slopes up to 30%.

Segway i220E LIDAR

NEW

rrp £1399.00

The same basic model as the Segway i210E Lidar but is capable of cutting **up to 2000 square metres**. Navigation is by **Lidar** and AI cameras so no satellite connection required. Handles slopes up to 30%.

Segway i210E LIDAR PRO - AWD

NEW

rrp £1399.00

***** See details of our price promise on page 2 *****

The same basic machine and benefits as the X315E and X330E but capable of cutting **up to 5000 square metres**.

Segway X390E

rrp £3499.00

The same basic machine and benefits as the X315E and X330E but capable of cutting **up to 10,000 square metres**.

Robot Mowers – cont

Autonomous robots with wire-free installation

Segway X420E

NEW

rrp £2199.00

The new X4 range is the sturdiest construction of the Segway robot mowers and offers **4 Wheel Drive** capable of handling slopes up to 80%. Navigation is a combination of **satellite RTK (Network or Local), Lidar and Visionfence AI cameras**. The X420E is capable of cutting areas up to **2000 square metres**.

Segway X430E

NEW

rrp £2499.00

The new X4 range is the sturdiest construction of the Segway robot mowers and offers **4 Wheel Drive** capable of handling slopes up to 80%. Navigation is a combination of **satellite RTK (Network or Local), Lidar and Visionfence AI cameras**. The X430E is capable of cutting areas up to **3000 square metres**.

Segway X450E

NEW

rrp £2799.00

The new X4 range is the sturdiest construction of the Segway robot mowers and offers **4 Wheel Drive** capable of handling slopes up to 80%. Navigation is a combination of **satellite RTK (Network or Local), Lidar and Visionfence AI cameras**. The X450E is capable of cutting areas up to **5000 square metres**.

MAMMOTION YUKA 2WD RANGE

Yuka Mini 600

rrp £549.00

The Yuka Mini 600 is the smallest of their robots that operate entirely via GPS and therefore do not require a boundary wire. AI cameras enable avoidance of obstacles and allow cutting of shaded areas where the satellite signal may be weak. This mower is capable of cutting **up to 600 square metres**. (Vision + RTK)

Yuka Mini 800

rrp £649.00

The Yuka Mini 800 is based on the Yuka Mini 600 but with increased battery capacity is capable of cutting **up to 800 square metres**. (Vision + RTK)

Yuka Mini 2 800

New for 2026

rrp £949.00

Capable of cutting **up to 800 square metres**. (Vision only)

Yuka Mini 2 1000

New for 2026

rrp 1149.00

Capable of cutting **up to 1000 square metres**. (Lidar)

MAMMOTION LUBA 4WD RANGE

Luba Mini AWD 800

rrp £999.00

The Luba 2 Mini 800 is the smallest of their 4 Wheel Drive robots that operate entirely via GPS and therefore do not require a boundary wire. This mower is capable of cutting **up to 800 square metres**. AI cameras enable avoidance of obstacles and allow cutting of shaded areas where the satellite signal may be weak.

4 Wheel Drive allows cutting of steeper slopes and also benefits when travelling over more uneven ground. (Vision + RTK)

Luba Mini AWD 1500

rrp £1399.00

The Luba 2 Mini 1500 is based on the AWD 800 but capable of cutting **up to 1500 square metres**. 4 Wheel Drive allows cutting of steeper slopes and also benefits when travelling over more uneven ground. (Vision + RTK)

***** See details of our price promise on page 2 *****

Capable of cutting **up to 5000 square metres**.

Autonomous robots with wire-free installation

Alko Robolinho 500 Vision

£499.00

rrp £599.00

The Robolinho 500 Vision is the smallest of their robots that operate via GPS and RTK and therefore do not require a boundary wire. Additional camera to aid navigation. This mower is capable of cutting **up to 500 square metres**.

Ego Aura Range

Ego RMR1500E

£2084.00

rrp £2199.00

The Ego Aura-R2 1500 is the smallest of the new Ego Robot Mower range. The Aura R-2 machines are satellite guided and this machine is capable of cutting areas up to 1500 square metres. Supplied with 5Ah battery and 75w charging station.

RTK antenna with wall bracket costs £185.00 if required.

Ego RMR3000E

£2484.00

rrp £2599.00

The Ego Aura-R2 3000 is similar specification to the Aura-R2 1500 but is capable of cutting areas up to 3000 square metres.

RTK antenna with wall bracket costs £185.00 if required.

Ego RMR6000E

£3234.00

rrp £3399.00

The Ego Aura-R2 6000 is currently the largest of the new Ego Robot Mower range. The Aura R-2 machines are satellite guided and this machine is capable of cutting areas up to 6000 square metres. Supplied with 10Ah battery and 150w charging station.

RTK antenna with wall bracket costs £185.00 if required.
